

PCS Services Overview

Professional Cabling Solutions

Why Choose PCS?

Professional Cabling Solutions has been serving leading businesses as a single-source provider for Voice and Data Infrastructure, Phone Systems, Audio/Video Distribution and Video Surveillance since 2003. We serve as a one-stop solution for many small businesses and Fortune 1000 clients nationwide. PCS provides superior service, expert installation and the highest quality IT infrastructure and telecommunications solutions- guaranteed!

Our Core Expertise

We excel in the planning, design and implementation of voice and data networks. These networks must support an array of equipment and systems critical to the enterprise—in both a wired and wireless environment. PCS is proficient in handling small, medium and large scale projects for customers locally, regionally and nationally.

"As a start-up, we needed a partner to help us with our cabling, access control and video surveillance needs. We selected PCS based on a referral from a trusted friend and PCS has proven to be an excellent partner. They helped us through the selection and design process and did a great job cabling our new headquarters. I'm very pleased and plan to use PCS for future projects and locations."

-Chip Burke, Chief Technology Officer, Education at Work

Structured Cabling

A structured cabling system can support multiple voice, data, video and multimedia systems - regardless of the manufacturer.
